Corporate Design:

1. **Logo:** Our logo uses basic geometric shapes to ensure it remains clear and recognizable across all formats, from large website headers to small thumbnails. The filmstrip icon communicates the project's connection to cinema, making it relatable for movie enthusiasts. The star symbol evokes the idea of film ratings. We chose a warm, neutral green tone for the logo to create a balanced and adaptable look.

2. **Color Palette:** Our color palette combines energetic and grounded tones, balancing creativity with professionalism.
    Primary Colors:
    *   #FAFFFA (Mint Cream): subtle background tone, ensures readability
    *   #5C6B3D (Dark Moss Green): complements both bright and dark colors, adds balance
    *   #0D142B (Oxford Blue): provides strong contrast for typography and navigation, ensures readability

    Accent Colors - draw the viewer's eyes to key elements and complement the primary colors

- #0044FF (Palatinate Blue)
- #ABFA54 (Green Yellow)
- #FF5930 (Giants Orange)

0044FF	ABFA54	FAFFFA	5C6B3D	FF5930	0D142B
Palatinate blue	Green Yellow	Mint cream	Dark moss green	Giants orange	Oxford Blue

3. **Typography:**
   - ○ Font Family: For titles, we utilized the font *Oswald,* which we will also utilize for the headers. This typeface is bold, geometric, and slightly condensed, giving titles a strong, impactful presence. For the body text, we used *Merriweather*. This serif typeface is excellent for readability for longer texts and creates a balanced contrast to the bold headers.
     - ■ Headers: larger size (e.g., h1 {font-size: 2.5rem;})
     - ■ Main Body: slightly smaller text (1rem)

4. **Layout:**
The website layout follows a clean design with a fixed header that contains the logo and navigation bar. The main section uses white space and consistent margins for readability. The color palette we established was used: the background ensures contrast with Oxford Blue text, and buttons use Green Yellow when you hover over them. The footer adds symmetry with the Dark Moss Green background.

5. **Imprint Page:**
The imprint page includes the following disclaimer as required by German regulations. It also lists the group's contact address.

6. **CSS Implementation:**
 All design elements described above are implemented in the CSS file (style.css). This ensures consistency across all pages and maintains the project's corporate identity.
